

RESOLUTION NO. 19-02

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF GOLETA, CALIFORNIA FOR THE APPROVAL OF A GENERAL PLAN AMENDMENT TO AMEND THE CITY'S TRANSPORTATION ELEMENT, FIGURE 7-2: FUNCTIONAL STREET CLASSIFICATION AND KEY INTERSECTIONS MAP AND TO AMEND RELATED TRANSPORTATION ELEMENT POLICIES IN POLICY TE 3: STREETS AND HIGHWAYS PLAN AND STANDARDS

WHEREAS, the Goleta General Plan / Coastal Land Use Plan ("General Plan") is the City's official policy that guides land use and physical development of the geographic area of the incorporated City limits; and

WHEREAS, California Government Code, Section 65350 et. seq., authorizes cities and counties to prepare, adopt and amend General Plans and their elements; and

WHEREAS, California Government Code, Section 65358 (a) reads, "If it deems it to be in the public interest, the legislative body may amend all or part of an adopted General Plan. An amendment to the General Plan shall be initiated in the manner specified by the legislative body. Notwithstanding Section 66016, a legislative body that permits persons to request an amendment of the General Plan may require that an amount equal to the estimated cost of preparing the amendment be deposited with the planning agency prior to the preparation of the amendment."; and

WHEREAS, City Council Resolution No. 12-13 establishes a procedure for the initiation of processing of requests for a General Plan Amendment; and

WHEREAS, City Council Resolution No. 12-13 requires the City Council to consider certain factors for the initiation of General Plan amendments including consistency with the Guiding Principles and Goals of the General Plan, consistency with the surrounding community or General Plan, possible public benefits, availability of or the future study of the availability of public services, or rules or regulations that may drive the need to amend the General Plan; and

WHEREAS, on October 3, 2017, the City Council adopted Resolution 17-44 initiating a General Plan Amendment to Transportation Element Figure 7-2: Functional Street Classification and Key Intersections Map and Related Transportation Element Policy TE 3: Streets and Highways Plan and Standards ("Amendment"); and

WHEREAS, the amendments to the General Plan Transportation Element are to update the City's California Road System (CRS) street function

classifications, which are maintained by Caltrans and recorded by the Federal Highway Administration (FHWA); and

WHEREAS, on October 9, 2017, City Staff submitted a complete application to Caltrans requesting the reclassification of 31 “Major Collectors” to “Local” streets; and

WHEREAS, on October 25, 2017, the FHWA received the Caltrans concurrence letter recommending approval of the 31 requested reclassifications; and

WHEREAS, on October 26, 2017, the FHWA approved the City’s requested reclassifications and on February 6, 2018, updated the street classifications Map No. 10u22 in the California Road System (CRS) to reflect the local roadway reclassifications and posted them on the Caltrans website; and

WHEREAS, on December 10, 2018, the Planning Commission conducted a duly noticed public hearing on the Amendment, at which time all interested persons were given an opportunity to be heard; and

WHEREAS, on January 15, 2019, the City Council conducted a duly noticed public hearing on the Amendment, at which time all interested persons were given an opportunity to be heard; and

WHEREAS, the City Council considered the entire administrative record, including staff reports, the General Plan, and oral and written testimony from all interested persons.

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF GOLETA, AS FOLLOWS:

SECTION 1. RECITALS

The City Council hereby finds and determines that the foregoing recitals, which are incorporated herein by reference, are true and correct.

SECTION 2. FINDINGS

The City Council makes the following findings:

1. Pursuant to Resolution No. 12-13,
 - (a) The Amendment is consistent with the nine Guiding Principles and Goals of the General Plan as the Amendment conforms to Transportation Element Guiding Principles. Specifically, Goal #1 states that the City

“[p]lan and provide transportation facilities and services in a manner that reinforces, rather than detracts from, the character of the community and its quality of life” and Goal #5 states that the City will “[c]reate a convenient, safe, and well-maintained street network”; and

- (b) The Amendment will have no material effect on the community or the General Plan because the Amendment to Figure 7-2 is merely to reflect current circumstances rather than facilitate a change to the community in the future and the revisions to the definitions and standards will ensure that the City’s street standards better align with state and federal standards; and
 - (c) The Amendment provides additional public benefit to the community as compared to the existing situation by allowing local roads to have enforceable speed limits; and
 - (d) The Amendment does not impact public services as the Amendment only serves to update the classifications of existing roadways; and
 - (e) The Amendment is not required under other rules or regulations.
2. Pursuant to Government Code section 65358, the Amendment to the General Plan Transportation Element is in the public interest.
 3. Pursuant to the California Environmental Quality Act (Public Resources Code, §§ 21000, et seq., “CEQA”) and the regulations promulgated thereunder (14 Cal. Code of Regulations, §§ 15000, et seq., “CEQA Guidelines”), the Amendment is exempt because there is no possibility that the activity in question may have a significant effect on the environment, as more particularly described in the Notice of Exemption in Exhibit 3, which is incorporated herein by reference. (CEQA Guidelines section 15061(b)(3).)

SECTION 3. APPROVAL OF GENERAL PLAN AMENDMENT

The City Council adopts the Amendment to the General Plan Transportation Element, included as Exhibit 1 (Policy TE 3 text amendments) and Exhibit 2 (Figure 7.2 amendment), which are incorporated herein by reference.

SECTION 4. DOCUMENTS

The documents and other materials that constitute the record of proceedings upon which this decision is based, are in the custody of the City Clerk of the City of Goleta, located as 130 Cremona Drive, Suite B, Goleta, California, 93117.

SECTION 5. CERTIFICATION

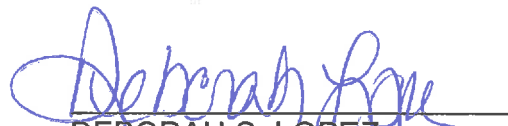

The City Clerk shall certify to the passage and adoption of this resolution and enter it into the book of original resolutions.

PASSED, APPROVED AND ADOPTED this 15th day of January, 2019.

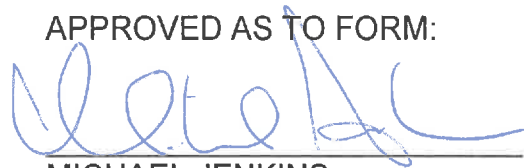

PAULA PEROTTE
MAYOR

ATTEST:

DEBORAH S. LOPEZ

CITY CLERK

EXHIBIT 1

General Plan Text Amendment: TE 3.3 – TE 3.6

TE 3.3 Principal Arterials. [GP/CP] Routes designated as principal arterials are shown in Figure 7-2. The following criteria and standards shall apply to these streets:

Principal Arterial—Los Carneros Overpass

- a. Definition/Function: Principal arterials are continuous routes that carry through traffic between various neighborhoods and communities, frequently providing access to major traffic generators such as shopping areas, employment centers, recreational areas, higher-density residential areas, and places of assembly. Driveway access, especially for residential uses, to a principal arterial is generally discouraged or kept to a minimum in order to facilitate traffic flows.
- b. Access to Abutting Properties. Although established patterns of development in Goleta have created driveways along most arterial segments, access to abutting properties shall be managed to maximize safety and functionality for through traffic, including but not limited to the following characteristics:
- 1) Driveways shall have sufficient width to minimize conflicts between through traffic and turning movements.
 - 2) Driveways shall adhere to safe sight-distance requirements to the extent feasible.
 - 3) New development abutting principal and minor arterials shall accommodate safe ingress and egress without necessitating backing movements into the arterial.
 - 4) Where feasible, sharing driveways with adjoining properties is encouraged, with provision of reciprocal access easements.

Where street standards cannot be fully met and access from the arterial must be approved due to the absence of any other feasible and practicable alternative, development intensity may be reduced on the site to lessen or avoid potential traffic safety hazards and vehicular conflicts.

- c. Design Standards. The following standards shall apply:
- 1) A principal arterial may be a divided or an undivided multi-lane street, with or without center median.
 - 2) The maximum number of through-travel lanes shall be two lanes in each direction except for street segments between US-101 and Hollister Avenue, where the maximum number of lanes shall be three lanes in each direction.
 - 3) Lane widths and intersection geometrics shall be adequate to accommodate transit vehicles and large trucks.
 - 4) Intersections of arterials with cross-routes are provided at grade, although partial control of access may occur at some locations. Intersection controls shall give priority to traffic flow on the arterial rather than the cross-route.
 - 5) Principal arterials shall include facilities to accommodate pedestrians and bicycles.

- 6) At a minimum, principal arterials shall include curbs, gutters, and sidewalks. Principal arterials may include landscaped medians and/or landscaped strips between curb and sidewalk.
- 7) Parking may be provided in appropriate segments on either or both sides of the street.

TE 3.4 Minor Arterials. [GP] Routes designated as minor arterials are shown in Figure 7-2. The following criteria and standards apply to these streets:

- a. Definition/Function: Minor arterials serve as a secondary type of arterial street carrying local through traffic within communities, frequently providing access to shopping areas, employment centers, recreational areas, residential areas, and places of assembly. A minor arterial may connect different neighborhood areas within the city.
- b. Design Standards: The following standards shall apply:
 - 1) A minor arterial may be a divided or an undivided multi-lane street, with or without center median.
 - 2) The number of through-travel lanes is usually one lane in each direction, although two lanes may be provided on particular segments, when warranted by traffic volumes.
 - 3) Lane widths and intersection geometrics shall be adequate to accommodate transit vehicles and large trucks.
 - 4) Intersections of arterials with cross-routes are provided at grade, although partial control of access may occur at some locations. Intersection controls shall give priority to traffic flow on the minor arterial rather than the cross- route, except where the cross-route is a major arterial.
 - 5) Minor arterials shall include facilities to accommodate pedestrians and bicycles.
 - 6) At a minimum, minor arterials shall include curbs, gutters, and sidewalks. Minor arterials may include landscaped medians and/or landscaped strips between curb and sidewalk.
 - 7) Parking may be required in appropriate segments on either or both sides of the street.

TE 3.5 Major Collectors. [GP/CP] Routes designated as major collectors are shown in Figure 7-2. The following criteria and standards apply to these streets:

- a. Definition/Function: Major collectors function to collect traffic from local streets and to carry that traffic to principal or minor arterials. Collectors may also link two arterials as well as collecting traffic from local streets and abutting driveways. Collectors are designed to provide access to local streets within residential and commercial areas or to connect streets of higher classifications to permit adequate traffic circulation.
- b. Design Standards: The following standards shall apply:
 - 1) Collectors shall generally not exceed two travel lanes (one lane in each direction) and shall generally be undivided streets.
 - 2) Collectors generally should not form a continuous system, so that they cannot easily be used as substitutes for arterials.
 - 3) Intersections of collectors with cross-routes are provided at grade. Intersection controls shall give priority to traffic flow on the arterial rather than the collector.
 - 4) Collectors shall include facilities to accommodate pedestrians and bicycles.

- 5) At a minimum, collectors shall include curbs, gutters, and sidewalks.
Collectors may include landscaped strips between curb and sidewalk.
- 6) Parking may be required in appropriate segments on either or both sides of the street.

TE 3.6

Local Streets. [GP/CP] All streets not specifically designated in another category shall be classified as local streets as shown in Figure 7-2. The following criteria and standards apply to local streets:

- a. Definition/Function. A local street provides access to abutting individual properties and links such properties and their uses to a collector or arterial. City street standards shall ensure that local streets provide access to abutting properties and should include a variety of designs and spacing, depending on access needs. Local streets are intended to serve only adjacent uses and are intended to protect residents from the impacts of through traffic.
- b. Design Standards. The following standards shall apply:
 - 1) Local streets shall be designed in a manner consistent with the character of the adjacent neighborhood and uses and any physical and environmental constraints.
 - 2) In appropriate segments, full urban street standards shall be required, including curb, gutter, and sidewalks on both sides of the street. Bicycle lanes should be provided if the street is designated as a Class 2 bicycle route in the City's Bicycle Transportation Plan.
 - 3) Local street standards should encourage residential access points to be located on the least traveled street wherever there is an option.
 - 4) Parking may be required in appropriate segments on either or both sides of the street.
- c. Other. New multi-family residential and commercial development should not have primary access on local streets, except where there is no feasible alternative.
- d. Traffic Calming. The City shall emphasize the use of local streets for local access and residential traffic in order to minimize traffic noise, congestion, and other hazards to residential uses and pedestrians. Through traffic may be discouraged by a variety of methods, such as installation of traffic calming devices or setting lower speed limits, provided there is involvement and support from the immediate neighborhood.

Project Description:

This project is for a General Plan Amendment to the City of Goleta's Transportation Element Figure 7-2: Functional Street Classification and Key Intersections Map and to amend related Transportation Element policies in Policy TE 3: Streets and Highways Plan and Standards. While this GPA would not have a material effect on the community or the General Plan, the changes to Figure 7-2 and to some of the language within four General Plan policies within TE 3 (TE 3.3 - TE 3.6) would update the General Plan street system classifications to reflect current conditions and standards, but would not facilitate development or other physical changes to the community in the future. General Plan consistency with the CRS maps provides a public benefit to the community by ensuring internal consistency of City documents and ensuring that accurate information on City streets is provided to the public. Since the CRS map has been changed the City currently can enforce "local" streets under the *prima facie* 25 mph speed limit. The GPA will improve overall safety by clarifying in the General Plan the City's ability to post and enforce the *prima facie* speed limit on those streets that meet the State requirements for designation as "local."

Finding:

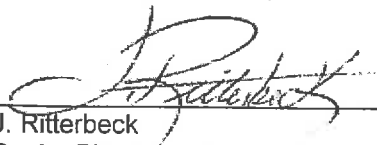

The Planning and Environmental Services Department of the City of Goleta has reviewed the above proposed project and found it to be exempt from the provisions of the California Environmental Quality Act (CEQA).

- Ministerial Project
- Categorical Exemption
- Statutory Exemption
- Emergency Project
- Quick Disapproval [CEQA Guidelines, Section 15270]
- No Possibility of Significant Effect [CEQA Guidelines, Section 15061(b)(3)]

Supporting Reasons:

This GPA is exempt from California Environmental Quality Act (CEQA) requirements per Section 15061(b)(3) Review for Exemption of the CEQA Guidelines. Section 15061(b) states, "A project is exempt from CEQA if: (3) the activity is covered by the general rule that CEQA applies only to projects which have the potential for causing a significant effect on the environment. Where it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment, the activity is not subject to CEQA."

The reclassification of thirty-one "Major Collector" to "Local" streets will have no physical changes and will result in no expansion of use. The minor revisions to the Transportation Element text provide clarification to definitions and standards of four transportation-related policies in the General Plan. Consequently, the GPA does not represent an activity that has a significant effect on the environment. Further, there are no unusual circumstances which would create a possibility that there would be a significant effect. Therefore, the GPA can be found to be exempt from CEQA.
