FOR MEMBER OF THE CITY COUNCIL

Bruce J. Wallach, Age 59

Occupation; Writer

I have resided in Goleta for the past 23 years. I received my bachelor’s degree in psychology from the University of California at Davis. I also spent one year at Stanford. I began graduate study at CSUSB. My third job was as a lab assistant at HEPL (High Energy Physics Laboratory) and SLAC (Stanford Linear Accelerator Center) at Stanford. I was on the project with E.B. Hughes, who discovered the quark. I discovered the walon or rare muon decay while on this project.

I feel the main issue this election is the corona virus. This virus has disrupted our lives, and we must continue positive steps such as social distancing and testing until a cure for covid 19 is found, or a vaccine is created. Prevention of infection through isolation may be just as important as finding a cure.

My vision for Goleta in the long range includes making Goleta an environmental paradise with bird, mammal, and other native species of animals and plant preserves in the Los Carneros lake area. For the homeless I would like to see the county make a shelter for those in Goleta who cannot come in out of the rain. For Old Town, I would like to see the narrowing of Hollister, brick sidewalks, new facades, and parking.
