

### 3.12 PUBLIC SERVICES AND UTILITIES

Section 3.12 of the GP/CLUP Final EIR (City of Goleta 2006) describes the following within the existing City boundary:

- environmental setting (existing conditions and regulatory setting) for public services and utilities relating to the proposed project;
- the impacts associated with public services and utilities that would result from the proposed project; and
- mitigation measures that would reduce these impacts.

Issues related to water supply are addressed in Section 3.9 “Water Resources,” of this Supplemental EIR.

The GP/CLUP amendments listed in Table 2-1 of this Supplemental EIR would not result in greater or different impacts to public services and utilities than those analyzed in the Final EIR, do not have the potential to result in new potentially significant impacts to public services and utilities, and are not proposed to policies cited as mitigation for potential impacts to public services and utilities in the Final EIR. **Accordingly, the proposed GP/CLUP amendments would not affect the analysis presented in Section 3.12 of the Final EIR, and no further discussion need be presented in this Supplemental EIR.**
