Erosion and Sediment Control Plan

For Projects Disturbing Less Than One Acre and Not Part of a Larger Plan of Development

Plan Check No. _____

Developers of sites requiring a Grading Permit that disturb less than one acre and are not part of a larger plan of development, are required to submit an Erosion and Sediment Control Plan prior to the issuance of a Grading Permit. Complete all sections and submit with the Grading Plan. If this Erosion and Sediment control Plan is revised, this form must be resubmitted for review and approval of revisions.

Size of Project (sq. ft.) _____ Estimated disturbed soil area _____

Type of Project (check all that apply) Residential Commercial Industrial Landscape Tenant Improvement Site Work New Construction Remodel Addition

Description of Work _____

Nearest Water Bodies and Distance from Project _____

Project Threat to Water Quality. In your response consider site slope, drainage pattern, project size and type, soil erosion potential, and proximity to water bodies. _____

Anticipated Start of Project _____ Date Anticipated Completion _____ Date

Other Applicable Permits (check all that apply) US Army Corps 404 Construction General Permit
 401 Water Quality Certification Fish & Game Agreement _____
Other (Identify)

Any permits directly associated with grading activity shall be obtained and evidence of attainment submitted to the City prior to commencing any soil disturbing activities.

THE FOLLOWING INFORMATION IS REQUIRED FOR ALL EROSION AND SEDIMENT CONTROL PLANS.

- 1. Site Plan** Applicant shall provide a site plan as part of the grading plan with the following information: Show all Best Management Practices (see below) to be placed on and off site; north arrow; slope direction; scale; location of all existing structures and impervious surfaces; location of any nearby waterways or basins; nearby storm drain inlets; frontage and side streets; and existing vegetation and trees.
- 2. Best Management Practices (BMPS)** At a minimum, the following BMPs are required. Verify ALL of these measures are addressed on the project site plan submittal.

A. Wet Weather Measures If possible, avoid land-disturbing activities during the wet weather season of October 1 through May 31.

B. Existing Vegetation Protect existing vegetation wherever possible.

C. Perimeter Control A properly installed silt fence or equivalent shall be installed around the site perimeter and located so that all runoff from the construction site is filtered prior to leaving the site.

D. Construction Site Entrances shall be designed and maintained to prevent all construction vehicles and equipment from tracking dirt or mud off site. Periodic street sweeping may also be needed.

E. Erosion control measures such as erosion control blankets or equivalent shall be used to protect small, highly erodible areas, and temporary stockpiles of material.

F. Catch Basin Protection Catch basins or drop inlets that receive storm water must be covered or otherwise protected from receiving sediment, mud, dirt, or debris.

G. Waste Management All construction waste including paint, concrete, or any other type of wash out, shall be contained and disposed of properly; no construction material shall be washed to the street.

- 3. Site-Specific BMPs.** List all site-specific BMPs not listed above (use additional sheets as necessary)

- 4. Rational.** Explain the basis for selecting site-specific BMPs; provide soil loss calculations if necessary (use additional sheets as necessary)

Contractor shall inspect BMPs regularly and prior to storm events. Contractor shall maintain BMPs in good repair at all times.
